DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hearn et al. (US 5,640,505).

Regarding claim 1, Hearn et al. disclose a system relates to an operational support structure for a telecommunications network. The system comprises of a problem manager 143 for receiving fault report from the other domains, using information contained in the database 130 concerning the network topology, it correlates these faults and identifies the problems which are causing them. It many receives reports of faults from a set of switches and also a set of multiplexer. By retrieving data on the network topology from the database 130, it can correlate these faults end might identify the problem which is causing the faults as being caused by failure of

a particular multiplexer. The Identified problems are recorded in the database 136, and the manager 143 sends instructions to the traffic manager 138, the service domain 14 or the traffic domain 18 to restore lost services and to remove problems (see figs. 2, 5; and col. 11 lines 21-34). Hearn et al., further disclose, this could be implemented in an ATM network (see col. 7 lines 36-52).
